PARENTS REDISCOVER THEIR KNOWLEDGE!

"Oh, I did not know IDEA meant Individuals with Disabilities Education Act."

"Wow, I have learned so much information."

"This knowledge has given me the tools to advocate better."

"How come I haven't heard of you before? Had I known about you, I may have been able to get my child the help they needed earlier!"

LDAH is a 501(c)(3) nonprofit supporting parents, families, and professionals to meet the needs of children and youth (birth to 26) with disabilities. We offer training, high-quality resources, and advocacy assistance at no cost to families.

Leadership in Disabilities & Achievement of Hawai'i

HAWAI'I & PACIFIC ISLAND PARENT TRAINING & INFORMATION CENTER

"We support parents of children with disabilities and the professionals who serve them."

HAWAI'I & PACIFIC ISLAND PTI

LDAH is the Parent Training & Information Center (PTI) for the state of Hawai'i. As of 2025, LDAH works with its new partners to bring PTI services to American Samoa, Guam, the Republic of Palau, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Commonwealth of the Northern Mariana Islands. As a PTI, LDAH and its partners provide information and referral, mentoring and advocacy, and education and training to parents and family members of children with disabilities, as well as to the professionals who serve them. Our goal is to ensure all children with disabilities receive a proper public education.

Serving Our Island Communities for 57 Years

OUR MISSION

To enhance educational, work, and life opportunities for children and youth with or at risk of disabilities by empowering them and their families through screening, identification, information, training, and mentoring, as well as public outreach and advocacy.

OUR VISION

Individuals have the choice and access to educational, work, and life opportunities to be successful, regardless of their disabilities.

OUR CORE VALUES

- Advocating for the rights of children with disabilities
- Putting families first
- Creating partnerships
- Improving communication
- Implementing best practices & innovation
- Ensuring accountability

OUR SERVICES

INFORMATION & REFERRAL

Our Parent Consultants are available Monday to Friday, 8 AM to 5 PM, for information and referrals. First-time callers can request an Aloha Packet with resources to assist you with your child's disability.

MENTORING & ADVOCACY

Parent Consultants offer personalized support by listening to your concerns, gathering information, and providing resources to help meet your child's educational and disability needs. Assistance, mentoring, and advocacy are available until your child's needs are met.

PARENTS AS PARTNERS

Join "Parents as Partners" (PAP) as a volunteer to support families using your experience, with training and guidance from LDAH. Help connect with your community, improve services for children with disabilities, and enhance parents' involvement in their children's education.

EDUCATION & TRAINING

Our interactive workshops include training on special education, disabilities and disability awareness, and state and federal disability law for parents and professionals to help meet the needs of children and youth with disabilities. Workshops are available to the public throughout the state.

SCHOOL READINESS PROJECT (SRP)

SRP supports O'ahu families with children ages 0-5 by offering developmental, social-emotional, hearing, vision, and autism screenings. We provide case management for identified concerns and training on early childhood health and milestones.

We help families establish a medical home and assist pediatricians in meeting each child's needs. Our mobile screening unit is ready to serve your neighborhood!

Leadership in Disabilities & Achievement of Hawai'i

School Readiness Program

Focused on nurturing and empowering young learners to thrive in their educational journey through early screening

OUR GOAL

To break down barriers and improve access to higher-quality early childhood services through early detection screenings, while providing quality programs to those referred through the process

WHO WE SERVE

We serve preschool students ages 0-5 across Hawai'i, Kaua'i, Lana'i, Maui, Moloka'i, and O'ahu. By offering developmental social emotional, hearing, and vision screenings.

CHILDHOOD SCREENINGS

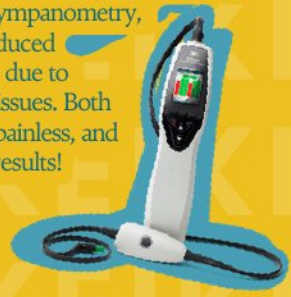

VISION

We use the Plusoptix Digital Vision Screener to check your child's eyes. It is an accurate, non-invasive method for detecting a variety of vision issues in children. The screening is quick and provides immediate results!

HEARING

Two methods are used to check your child's hearing. The first is Otoacoustic Emissions, which evaluates both the middle and inner ear. The second is Tympanometry, which checks for reduced eardrum movement due to fluid, wax, or other issues. Both methods are quick, painless, and provide immediate results!

DEVELOPMENTAL

Our qualified screeners use the Ages and Stages Questionnaire (ASQ-SE) for Social-Emotional development, and, if applicable, the ASQ-3, as assessment tools. These screenings help detect developmental concerns.

CASE MANAGEMENT

Case management is provided for families of children identified with specific needs through the screening process. Our staff will support you by explaining the screening results and offering next-step solutions. We will connect you with community resources and follow up on referrals made to other systems of care.

Get the Parents Perspective!

"We all can learn from this, I am so glad I came."

"Although COVID-19 happened, I am so glad LDAH is providing virtual training. Now I can be home with my kids and still jump on a training."

"I liked that it was informative and that the presenter answered all of our questions"

Building Awareness

LDAH is a 501(c)3 non-profit organization specializing in parent and professional development and support since 1968. As Hawai'i's Parent Training & Information Center, LDAH strives to spread awareness on disability-related issues through information dissemination, referral, and interactive workshops at no cost to parents.

New Workshops Available

Family Education Rights & Privacy Act

Parents have the right to access information in their child's education records held by the state, the local district, and/or the school. Parents can request to correct information in their child's records if they believe it is inaccurate, misleading or in violation of the privacy rights of the student. Want to know more?

Extended School Year

What is Extended School Year or ESY? There are 6 factors IEP teams consider annually: Nature of the Disabling Condition, Severity of the Disabling Condition, Areas of Learning Crucial to Self-Sufficiency Goals, The Extent of Regressions Caused by Interruptions, Rate of Recoupment after a Break in School, and Special Circumstances or Other Factors. Is ESY right for your child?

List of Workshops Still Available:

- A-B-C's of Advocacy
- All About Inclusion
- Understanding Autism Spectrum Disorders
- Chapter 19; Rules Regarding Discipline
- Early Childhood Health and Development
- Learning Disability, 101
- My Future! Post-secondary Transition
- So We Don't Agree-Resolve Disputes

Future Workshops

LDAH is committed to adapting trainings from our national technical assistance center to make them culturally relevant for our communities.
Visit our website for new training updates.

LDAH is offering Train the Trainer Workshops for Community Based Organizations serving families. Let us teach you so you can Teach your Families!!

Building the Foundation

The Law: IDEA 2004 and Section 504 of the Rehabilitation Act of 1973

Learn about the Individuals with Disabilities Education Improvement Act of 2004 and the Rehabilitation Act of 1973 (Section 504), and how they are designed to meet the unique needs of students with disabilities. Compare and contrast between a Individualized Education Program and a Modification Plan and how each affects your child. Hawaii Administrative Rules, Chapters 60 and 61 will be covered.

Special Education Workshop Series

Hawaii Administrative Rules, Chapter 60

Hawaii Administrative Rules, Chapter 60 has been signed by the Governor and has been in place since November 23, 2009. Become familiar with the rules affecting your child who receives or needs a Free Appropriate Public Education.

Understanding the Evaluation Process

Become familiar with the evaluation process and learn how to understand and utilize specific information from reports. Prepare for eligibility determination and the development of the IEP.

Developing My Child's IEP

Become familiar with the process of developing, reviewing, and revising an Individualized Education Program as an IEP team member according to standards presented in IDEA 2004 and Hawai'i's Administrative Rules Chapter 60.

For Parents Only!

Parent Talk Café is a LIVE online platform on Facebook for parents only. Subscribe to our parent group and build your special education resource network. We have monthly online training presented by experts in special education, related service providers and LDAH's Parent Consultants who specialize in Advocacy. Be a leader in your school community and share this with other

Connect Gen

Receive individualized support from LDAH personnel while developing a plan of action to address your primary concerns while networking with other parents. ***(A parent favorite!)***

New Workshops Available

Family Engagement

Parent N-gagement? Difficult Conversations

How do Educators reach difficult parents? Discover the six stages of adjustments when parents hear difficult news about their child. How do professionals engage with Parents. Does your engagement look like involvement or engagement? How do you determine which one it is?

Designing a Supportive IEP; Finding Common Ground for Optimal IEP Teams

This presentation is designed to re-think, and re-design the approach to special education meetings by finding common ground between parents and school personnel to improve student success.

Fostering Parent Professional Collaboration

In order for parent-professional collaboration to occur, several conditions must be present: Families need to feel welcome and appreciated, parents need to feel connected with the school and some parents will engage if they have specific and clear instructions. Indicators of collaborative partnerships are RESPECT, TRUST, OPEN COMMUNICATION, and SHARED GOALS.

For a complete list of workshops we offer visit our website at: www.LDAHawaii.org or call 536-9684
Neighbor Islands: 1-800-533-9684

Letter Writing, "What Do I Say?"

Participants will receive effective letter writing approaches to use when raising a concern, requesting information, request an action, provide information, decline a request and expressing appreciation. How to begin a letter, writing simple clear and concise letters, who and what is their position, and what to do when there is no response. Samples and suggested letter writing approaches are taken from Wrights Law, Emotions to Advocacy by Pete and Pam Wright.

A D / H D

Are you having difficulty . . . . .

Focusing?

Organizing?

Controlling Behavior?

Communicating Effectively?

What is Attention Deficit Hyperactivity Disorder (AD/HD)?

AD/HD is a neurobiological disorder. It is characterized by developmentally inappropriate impulsivity, inattention, and in some cases hyperactivity. Although individuals with AD/HD can be successful in life, without appropriate identification and treatment, AD/HD can have serious consequences. These consequences can lead to school failure, depression, conduct disorder, failed relationships, and substance abuse. Early identification and treatment are extremely important.

U.S. Office of Special Education Programs

What are the Symptoms of AD/HD?

Typically, AD/HD symptoms arise in early childhood, unless associated with some type of brain injury later in life. Some symptoms persist into adulthood and may pose life-long challenges. Although the official diagnostic criteria state that the onset of symptoms must occur before age seven, leading researchers in the field of AD/HD argue that criterion should be broadened to include onset anytime during childhood. The symptom-related criteria for the three primary subtypes are adapted from *DSM-IV* and summarized as follows:

Predominately Inattentive Type:

- Fails to give close attention to details or makes careless mistakes
- Has difficulty sustaining attention
- Does not appear to listen
- Struggles to follow through on instructions
- Has difficulty with organization
- Avoids or dislikes tasks requiring sustained mental effort
- Loses things
- Is easily distracted.
- Is forgetful in daily activities

Predominately Hyperactive-Impulsive Type:

- Fidgets with hands or feet, squirms in chair
- Has difficulty remaining seated
- Runs about or climbs excessively
- Difficulty engaging in activities quietly
- Acts as if driven by a motor
- Talks excessively
- Blurts out answers before questions have been completed
- Difficulty waiting or taking turns
- Interrupts or intrudes upon others

Combined Type:

- Individual meets both sets of inattention and hyperactive/impulsive criteria.

How do I get a diagnosis?

There is no single test to diagnose AD/HD. Therefore, a comprehensive evaluation is necessary to establish a diagnosis, rule out other causes and determine the presence or absence of co-existing conditions. Such an evaluation requires time and effort and should include a careful history and a clinical assessment of the individual's academic, social, and emotional functioning and developmental level.

Contact LDAH
to schedule an AD/HD workshop.

AUTISM SPECTRUM DISORDER

What is Autism?

Autism spectrum disorder (ASD) is a developmental disorder. It is characterized by difficulty with communication and interaction with other people. Autism is known as a "spectrum" disorder because there is wide variation in the type and severity of symptoms people experience. Although ASD can be a lifelong disorder, treatments and services can improve a person's symptoms and ability to function.

Leadership in Disabilities & Achievement of Hawaii

CONTACT INFORMATION

245 N. Kukui Street, Suite #205
Honolulu, Hawaii 96817
(808) 536-9684 Fax: (808) 537-6780
Neighbor islands: 1-800-533-9684
Website: www.ldahawaii.org

CAUSES

There is currently no known direct cause of ASD. There are risk factors that may increase the likeliness of developing ASD. Not everyone who has these risk factors develops ASD. These include: Having a family member with autism, having certain genetic or chromosomal conditions, children born to older parents, premature birth, prenatal exposure to thalidomide and valproic acid.

SYMPTOMS

- Making little or inconsistent eye contact
- Over- or under-sensitivity to sound, sight, taste, touch, or smell.
- Repetitive behaviors with body movements or spoken words
- Difficulty using or understanding language
- Not point at objects to show interest or look when a person points
- Difficulty understanding others feelings and facial expressions
- Having overly focused interests

DIAGNOSIS

- Talk to pediatrician about concerns. A referral can be made to a specialist such as a developmental pediatrician, child Neurologists, child psychologists or Psychiatrists
- For ages 0-3 years old contact Early Intervention for a free evaluation and services
- For ages 3 above contact your local public school and request an evaluation

TREATMENT

There is currently no cure for ASD. However, early diagnosis and treatment strategies can greatly help with coping with symptoms. Treatment and education needs are different for every child, and depends on the severity of symptoms. Services and treatments can include:

- Behavioral, psychological , and educational therapy Treatment may include special training and support for parents, speech and language therapy, occupational therapy, and/or social skills training.
- Medication can be prescribed to help relieve symptoms such as: Irritability, aggression ,repetitive behavior, hyperactivity, attention problems, anxiety, and depression.

DYSLEXIA

Are you having difficulty with . . . .

Reading?

Writing?

Spelling?

Math?

What is Dyslexia?

Dyslexia is a language-based learning disability. Dyslexia refers to a cluster of symptoms, which result in people having difficulties with specific language skills, particularly reading. Students with dyslexia usually experience difficulties with other language skills such as spelling, writing, and pronouncing words. Dyslexia affects Individuals throughout their lives; however, its impact can change at different stages in a person's life. It is referred to as a learning disability because dyslexia can make it very difficult for a student to succeed academically in the typical instructional environment, and in its more severe forms, will qualify a student for special education, special accommodations, or extra support services.

U.S. Office of Special Education Programs

What are some common signs of Dyslexia?

Formal testing is the best way to confirm a diagnosis of suspected dyslexia

Difficulty with planning, organizing and managing time, materials & tasks

Difficulty with written tasks (composition, spelling, transposing)

Difficulty with sequencing (incorrect order, letter or Word reversal, numbers, arithmetic signs

Difficulty remembering or recalling facts and information

Difficulty with the connection of letters and sounds

Relying on guessing or memorizing without understanding

They may also exhibit difficulties with one or more of the following:

Learning to Speak

Spelling

Learning a Foreign Language

Reading

Math Operations

Fine Motor

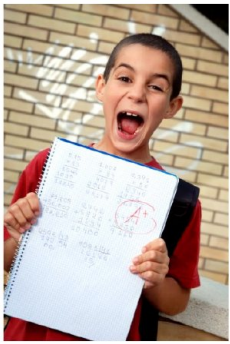

Formal testing of reading language and writing skills is the best way to confirm a diagnosis of suspected dyslexia.

What are the rights of a person with dyslexia?

The Individuals with Disabilities Education Act 2004 (IDEA), Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) define the rights of students with dyslexia and other specific learning disabilities. These individuals are legally entitled to special services to help them overcome and accommodate their learning problems. Such services include education programs designed to meet the needs of these students. The Acts also protect people with dyslexia against unfair and illegal discrimination.

LEARNING DISABILITY

Having Difficulty . . . .

Receiving Information?

Storing Information?

Processing Information?

Responding to Information?

What is a Learning Disability

A learning disability (LD) is a term used to describe the unexplained difficulty a person of at least average intelligence has in acquiring basic academic skills. This neurological disorder affects the brain's ability to receive, process, store and respond to information. Classified in the federal law as a specific learning disability, LD is not a single disorder. It is a term that refers to a group of disorders affecting a person's ability in the areas of listening, speaking, reading, writing and mathematics. Currently, almost 2.6 million school-aged children in the U.S. are classified as having specific learning disabilities (SLD) and receive some kind of special education support.

IDEAs that Work
U.S. Office of Special Education Programs

What are some common signs of Learning Disabilities?

- Often spelling the same word differently in a single document
- Reluctance to take on reading or writing tasks
- Trouble with open-ended questions on tests
- Weak memory skills
- Difficulty in adapting skills from one setting to another
- Slow work pace
- Poor grasp of abstract concepts
- Inattention to details or excessive focus on them
- Frequent misreading of information
- Trouble filling out applications or forms
- Easily confused by instructions
- Poor organizational skills

Strategies for individuals with Learning Disabilities

√ Break assignments into segments
√ Reduce the number of concepts introduced at any one time
√ Use checklists to help with organization
√ Provide opportunities for movement
√ Increase amount of time allowed to complete assignments/tests
√ Avoid pressures of speed and accuracy
√ Provide student with written information
√ Keep statements short and to the point

Contact Leadership in Disabilities & Achievement of Hawai`i to schedule an LD workshop.
